

Dear Friends,

Trails Carolina was founded on the premise that *adolescents and their families need and deserve a unique, clinically sophisticated and empowering way to meet their individual needs*. We at Trails understand that this is one of the most difficult decisions you as a parent and/or guardian will be asked to make on behalf of your child.

My team and I are **committed** to working with you to ensure that our unique and dynamic form of wilderness therapeutic intervention is the best possible placement for not only your child, but also your family as a whole.

Watching a child struggle is heartbreaking, but even more distressing is the sense of helplessness and hopelessness that often accompanies the downward spiral. Our goal is to provide an impactful and safe opportunity for students and their families to interrupt the negative acting out and begin the healing process. Using a variety of clinically sophisticated methodologies, Trails harnesses the proven impact of a wilderness experience and creates a milieu that supercedes traditional outdoor therapies. Our ability to provide broader assessment ranges allows for more focused personalization, individualization, and best of all, real and sustainable results. The best, and only, way we can do that is by partnering with you and becoming a team united in discovering the right trail to change the course of your child's life.

Thank you for your consideration of Trails Carolina. We look forward to the opportunity to helping you forge your child's path, and your family's trail.

Sincerely,

A handwritten signature in black ink, which appears to read "Graham Shannonhouse". The signature is written in a cursive, flowing style.
