RE: TRAILS Parents

Dear Parents,

Subject: Education

Thank you for your interest in Trails Carolina and your commitment to your child's personal and educational growth. In addition to offering academic credit in English, Earth/Environmental Science, Physical Education, and Art, we can work with your child's home school, continuing his/ her course load from Trails.

As per our program, your child will likely spend a week out of the month at the schoolhouse, in which time I can proctor the work sent by his/her home school. Outside of the classroom, your child will be focused on the other aspects of Trails' program and may have little time for their education.

In order to maximize classroom time, it is imperative for us to have established an educational plan before your child arrives at Trails. Please use the following steps as your guideline:

1. Contact your school administrator. Explain Trails' program and come up with a realistic academic plan for your child (i.e. completing open-book chapter tests). Be clear with the school that your child will have limited time, and determine what has to be completed before re-admittance.
2. Establish who will be the point person for giving and receiving work (individual teachers, guidance counselor, assistant principal, etc.).
3. Send me the details of the academic plan along with the contact information for your school administrator. I will review the plan and make contact with your school administrator. Make sure to fax a release of information to Trails so that I can contact the school.
4. Gather and send all necessary notebooks, textbooks, calculators, etc. that your child will need. These must be sent no later than your child's date of arrival.
5. I will send you your child's finished work as he/ she completes it and will ask for additional assignments as necessary.

Regards,

The Trail's Education Team.
